308 EXCIMER

A COMPLETE SOLUTION FOR THE TREATMENT OF PSORIASIS AND VITILIGO

AESTHETIC PRECISION

EXCIMER TECHNOLOGY IN THE PALM OF YOUR HANDS

- MONOCHROMATIC UVB LIGHT THERAPY
- QUICK AND PRECISE TREATMENT
- CLINICALLY PROVEN
- MAXIMUM SAFETY
- PAIN FREE
- NO DOWNTIME

CLEAR YOUR SKIN OF PSORIASIS QUICKLY AND EFFECTIVELY, AND RESTORE YOUR NATURAL PIGMENT LOST IN VITILIGO WITH THE 308 EXCIMER SYSTEM.

Producing new skin cells is a natural, healthy process that allows the body to renew and rejuvenate the skin. But when these cells grow too quickly, the skin can accumulate layers of dead skin resulting in thick, red, itchy patches or "plaques" that characterize psoriasis.

Vitiligo is also a chronic skin condition characterized by patches of skin losing their color. Both psoriasis and vitiligo are thought to be caused by an overactive immune system.

While topical creams and medications may offer some relief for psoriasis, long term

improvement requires a more advanced solution. And while vitiligo is thought to have no cure, advances in UVB technology have created new, highly effective treatment options based on light therapy.

308 Excimer by Alma Lasers is a safe, powerful and highly precise treatment solution for autoimmune diseases of the skin. Using intense monochromatic UVB light therapy, 308 Excimer uses a 308nm laser wavelength to effectively target skin lesions while leaving healthy skin protected and intact.

The Technology

- ∞ The 308nm wavelength is ideal for treating UV sensitive skin diseases such as psoriasis and vitiligo.
- ∞ 308 Excimer directs UVB light in short pulses to the affected areas of the skin, specifically treating the patches while leaving the surrounding skin unexposed.
- ∞ For psoriasis, persistent plaques are visibly reduced or eliminated usually after 5-10 treatment sessions.
- ∞ For vitiligo, pigment is restored after 20-30 treatment sessions.

"I am highly satisfied with my 308 EXCIMER SYSTEM due to its vast application range, outstanding speed and incomparable safety."

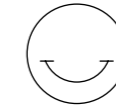

Dr. Jagdish Sakhiya, M.D.
Sakhiya Skin Clinic, Surat, India

Quick Treatment. Effective Results.

Clinically-Proven

Harnessing the power of the Excimer laser to treat autoimmune diseases of the skin.

Safe and Precise

Targets only the affected areas, leaving the surrounding skin unexposed and unharmed.

Quick Treatment

Treatments are quick with visible results after only a few sessions.

Pain Free

Treatments are 100% painless.

No Downtime

You can return to your normal activities immediately after treatment.
